

Ultra Skim Filter XL with Weir Turbine

Waterway's Ultra Skim Filter XL is now available with a built in Weir System. The Telescoping Weir prevents bugs and debris from floating out of the filter when the pump is turned off.

Features:

- Advanced Telescoping Weir System
- Turbine prevents cavitation
- Uses the same size hole pattern as our standard Dyna-Flo
- Allows for a larger variance of water levels

CARTRIDGE FILTER

CLEANING INSTRUCTIONS
Turn off pump. If inlet and outlet valves are closed, close them. If drain plugs are used, open them to drain all water from housing. Remove filter cartridge. Clean using garden hose. For cleaning of silt, turban tablets, etc., wash cartridge in warm water and detergent solution. For removing calcium deposits, using citric acid substance, simply soak cartridge in a commercially available cartridge cleaner or use one part muriatic acid with ten parts of water.

With bypass valve installed, flow may be exceeded but the filtration rate will not drop noticeably. 100% of water will be filtered.

MAXIMUM WORKING PRESSURE: 50 P.S.I.
If installed in pressure line
